- 2. Using two 3 digit numbers, create an addition problem. Your goal is to get the sum as close to 1,000 as you can.
- 3. The player whose addition problem has a sum closest to 1,000 wins the round.
- 4. Play six rounds. The player who wins the most rounds wins the game.

- 2 Using two 3 digit numbers, create a subtraction problem. Remember the larger number must come first! Your goal is to get the difference as close to zero as you can.
- 3. The player whose subtraction problem has a difference closest to zero wins the round.

4. Play six rounds. The player who wins the most rounds wins the game.
